Infectious Agents and Disease
Volume 5, 1996

Author Index

Adler, SP, 29
Andriole, VT, 47

Bigoni, B, 203
Boelaert, JR, 36
Boom, WH, 73

Cassai, E, 203
Chang, Y, 215

De Pauw, BE, 245
de Reuse, H, 191
Di Luca, D, 203
Donnelly, JP, 245

Ellner, JJ, 61, 62

Ford, DK, 223
Fujimura, Y, 144

Griffiths, PD, 231

Hackstadt, T, 127

Labigne, A, 191
Lambert, P-H, 55
Lee, CA, I

Madore, DV, 8
Meis, JFGM, 245
Mirandola, P, 203
Moore, PS, 215

Owen, RL, 144

Pass, RF, 240

Rappuoli, R, 21
Ravaioli, T, 203
Rich, EA, 108

Schwan, TG, 167
Siegrist, C-A, 55
Sinnis, P, 182
Stevens, DL, 157

Tingle, AJ, 223
Toossi, Z, 98
Tsuyuguchi, I, 82

Verweij, PE, 245

Wallis, RS, 119
Weinberg, ED, 36
Weinberg, GA, 36
Whitley, RD, 231

Infectious Agents and Disease
5:248–249 © 1996 Lippincott–Raven Publishers, Philadelphia

Infectous Agents and Disease
Volume 5, 1996

Subject Index

Acquired immunodeficiency syndrome (AIDS)
pathogenesis, 231
Adolescent vaccination
with acellular pertussis vaccines, 21
AIDS. *See* Acquired immunodeficiency syndrome
Alpha antigen
epitope mapping of, 120
Alveolar macrophages
HIV infection of, II 2
M. tuberculosis infection of, 108
Animal models
of tuberculosis, 62
Antigens
luminal, uptake by M cells, 147
of *M. tuberculosis*, new identification approaches, 119
Arthritis, rheumatoid
microbiological etiology, 223
Arthropods
model systems for investigating pathogen interactions, 167
Aspergillus infections
diagnosis and treatment, 47
Aspergillus infections, diagnosis and treatment, 245

Bacterial pathogens
evolution, 1
Borrelia
model systems for investigating tick interactions, 167
Borrelia burgdorferi, 173
Borrelia hermsii, 171
Bronchoalveolar cells
in HIV disease, 114
in tuberculosis, 111

CMV disease. *See* Cytomegaloviral disease
Common mucosal immunological system, 151
Congenital infections
CMV, immunization strategy, 240
Cosmid library, 121
Cytokines
circuits in tuberculosis, 98
Cytomegaloviral disease
immunization against, 29
Cytomegalovirus infection
congenital, immunization strategy, 240

Delayed-type hypersensitivity
in tuberculosis, 62
DNA vaccines, 55

Editorial, 61
Epitope mapping
of alpha antigen, 120

Fever
relapsing, 171

Folliculitis
mucosal lymphoid, 151

Gastric mucosa
H. pylori colonization, determinants, 191
Group A streptococcal disease
acute life-threatening infections, 158
invasive, 157
shock and tissue destruction, 161

***H**aemophilus itifluetizae* type b
immunization, 8
Helicobacter pylori
pathogenicity determinants, 191
Hepatocytes, malaria sporozoite transport, 182
Herpesvirus, Kaposi's sarcoma-associated, 215
HHV-6. *See* Human herpesvirus-6
HIV. *See* Human immunodeficiency virus
Human herpesvirus-6, distribution of human variants, 203
Human immunodeficiency virus, pulmonary immune response, 108
Human immunodeficiency virus infection
of alveolar macrophages, 112
bronchoalveolar cells, 114
iron metabolism, 36
Hypersensitivity
delayed-type, in tuberculosis, 62

Immune-mediated diseases
microbiological etiology, 223
Immune response
pulmonary, to *M. tuberculosis* and HIV, 108
to tuberculosis, 61
to tuberculosis, cytokines, 98
to tuberculosis, regulation, 82
Immunization. *See also* Vaccines
against cytomegaloviral disease, 29
against *H. influetizae,* 8
strategy for congenital CMV infection, 240
Immunological systems
common mucosal, 151
Immunoregulation
bronchoalveolar cell function, 111
Immunotherapy
cytokine, of tuberculosis, 103
Infant vaccination
with acellular pertussis vaccines, 21
Infections
AIDS, pathogenesis, 231
Aspergillus, diagnosis and treatment, 47, 245
congenital CW, immunization strategy, 240
group A streptococcal, acute life-threatening, 158
HIV, iron metabolism, 36
HIV, of alveolar macrophages, 112
M. tuberculosis, human immune response, 82, 98

M. tuberculosis, immunosuppression, 62
M. tuberculosis, of alveolar macrophages, 108
M. tuberculosis, pulmonary immune response, 108
M. tuberculosis, T-cell subsets, 73
malaria, sporozoite transport in liver, 182
Infective-immune diseases
microbiological etiology, 223
Iron metabolism
in HIV infection, 36
Ixodes scapularis, 173

Kaposi's sarcoma-associated herpesvirus, 215
KS. *See* Kaposi's sarcoma

Letters to the editor, 245
Liver
malaria sporozoite transport, 182
Luminal antigens
uptake by M cells, 147
Lyme disease, 173
model systems for investigating, 167
Lymphocytes
disease site, and microbiological etiology, 223
Lymphoid folliculitis
mucosal, 151
Lymphoid tissue
mucosa-associated, 151

Macrophages, alveolar
HIV infection, 112
M. tuberculosis infection, 108
Malaria sporozoite
liver transport, 182
MALT. *See* Mucosa-associated lymphoid tissue
M cells, 144
origin and development, 145
pathophysiological implications, 151
structure, 145
uptake of luminal antigens, 147
Microbiological etiology
and lymphocytes, 223
Monocyte Western blot, 121
Mucosa
gastric, determinants of *H. pylori* colonization, 191
Mucosa-associated lymphoid tissue, 151
Mucosal immunological system
common, 151
Mucosal lymphoid folliculitis, 151
Mycobacterium tuberculosis
antigens of, new identification approaches, 119
induction of cytokines, 101
Mycobacterium tuberculosis infection
of alveolar macrophages, 108
immune response to, cytokines, 98
immune response to, human, 82
immune response to, pulmonary, 108
immunosuppression, 62
T-cell subsets, 73

***O**rnithodoros Hermsi,* 171

Parasites
rickettsiae biology, 127
Pathogen-arthropod interactions
model systems for investigating, 167
Pathogenicity islands, 1
Pathogens
evolution, 1
Pertussis vaccines
acellular, 21
Pleural tuberculosis
model, 122
Pulmonary immune response
to *M. tuberculosis* and HIV, 108

Relapsing fever, 171
Rheumatoid arthritis
microbiological etiology, 223
Rickettsiae
biology, 127

Sarcoma, Kaposi's
KS-associated herpesvirus in, 215
Shock
group A streptococcal, 161
Skin testing
tuberculin, 64
Sporozoite
malaria, liver transport, 182
Spotted fever-group rickettsiae
biology, 127
Streptococcal toxic shock syndrome, 157
case definition, 164
StrepTSS. *See* Streptococcal toxic shock syndrome
Synovial lymphocytes
and microbiological etiology, 223

TB. See Tuberculosis
T-cells
subsets in *M. tuberculosis* infection, 62
T-cell Western blot, 119
Ticks, 171
model systems for investigating *Borrelia* interactions, 167
Towne vaccine, 29
Toxic shock syndrome
streptococcal, 157
Tuberculin skin testing
in tuberculosis, 64
Tuberculosis
animal models, 62
bronchoalveolar cells, 111
future prospects for prevention and immunological intervention, 93
immune response to, 61
immune response to, cytokines, 98
immune response to, regulation, 82
pleural model, 122
T-cell subsets, 73
Typhus-group rickettsiae
biology of, 127

Vaccines. *See also* Immunization
acellular pertussis, 21
cytomegaloviral, 29
DNA, 55
Towne, 29

Western blot
monocyte, 121
T-cell, 119
